

Call for Submissions

JoVE

A unique opportunity to publish a peer-reviewed video article in the JoVE Methods Collection:

Interactive Technologies for Behavior Change and Emotional Engagement

Submission link: <https://app.jove.com/methods-collections/3756>

What is JoVE?

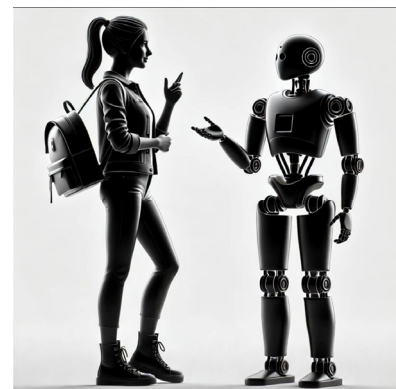

JoVE (Journal of Visualized Experiments) is **the world's first and leading peer-reviewed scientific video journal**. It helps increase visibility, reproducibility, and educational impact by publishing high-quality video articles. JoVE allows you to **visually demonstrate experimental procedures that are difficult to explain in text** — especially relevant for HCI, robotics, and affective computing. **Professional videographers assist with production**, and articles are indexed in **PubMed and Web of Science**.

JoVE is already widely used in the life sciences and engineering, with contributions from top universities worldwide. This collection is among the first to focus on Artificial Intelligence and Human-Centered Technologies.

Collection Topics Include:

but are not limited to:

- Human-Robot Interaction (HRI)
- Human-Agent Interaction (HAI)
- Affective Computing & Emotional Adaptation
- Behavior Change Technologies
- Persuasive Systems for Education, Health, and Communication
- Intelligent Artifacts and Socially Adaptive Systems

- **Abstract submission: June 11, 2025**
- **Full manuscript submission: August 11, 2025**
